In the context of the Marbefes project - Marine Biodiversity and Ecosystem Functioning leading to Ecosystem Services – we would like to capture the social and cultural benefits of marine environments, such as recreation, wildlife, wellbeing, and cultural heritage.

Do you live in, visit, or enjoy the Belgian coast? Help us to understand how it is used and valued.
An online survey has been launched in the Belgian coast.

We strongly encourage you to participate and distribute

This research considers how social and cultural aspects of coasts can be better included in marine policy and decision-making, and thereby help secure benefits for current and future generation.

survey: [Dutch] [English]
