

Our MARBEFES team were strong during the AZTI 2024 summer school (<https://www.azti.es/event/summer-school-2024/>) held in San Sebastián (Spain) between 11 and 13 June. Our colleagues, Julie Bremner, Mike Elliot and Tymon Zielinski run sessions and young researchers made their presentation too. **Gemma Smith** from @G4S_ECR also encouraged school participants to join the ECR network.

This 20th edition of AZTI's Summer School, the topic proposed is "Bridging the gap between marine science and policy: Communicating for an informed society and decision-making". This year, the school was organized in the framework of several Horizon Europe projects: GES4SEAS, OBAMA-NEXT, BiOcean5D, ACTNOW, Marine SABRES and MARBEFES.

See the program [here](#)!
