

Project Partners must promote the actions and results of the project by providing targeted information to multiple audiences in a strategic and effective manner. All communications and publications must comply with European Commission rules for dissemination as set down in the Grant Agreement (Art. 36). Any Communication activity relating to the action (including in electronic form, via social media) and any infrastructure, equipment and major results funded by the grant must:

(a) Display the EU Emblem on all outputs. (when displayed with another logo, the EU emblem must have appropriate prominence)

(b) Include the following text:

‘This Project has received funding from the European Union’s Horizon Europe research and innovation programme under grant agreement no 101060937’

MARBEFES (MARine Biodiversity and Ecosystem
Functioning leading to Ecosystem Services) involves
22 research institutes from 15 European countries
– from the warm shores of the Mediterranean,
to oceanic shores of Western Europe, brackish
Baltic and icy Svalbard archipelago.

AIMS

To determine the links between the biodiversity and functioning of the coastal and marine ecosystems and the resulting ecosystem services and societal goods and benefits.

To perform ecological and socioeconomic valuation through a validated toolbox enhancing policy and governance decisions aimed to secure marine ecosystem services for current and future generation.

To analyse the causes and consequences of changes in marine biodiversity and their ecological and economic values and their repercussions for the governance of European seas.

WHAT IS MARBEFES?

MARBEFES is a 4-year EU project that researches how marine biodiversity is linked with goods and services provided by marine ecosystems, in order to create policy and management tools that support informed decision-making.

To bridge the gap between research, policy and practice, we focus on stakeholders – the users and custodians of the sea.

Total budget: EUR 15,107,300
Duration: 48 months, from September 1, 2022

MARBEFES project has received funding from the European Union's Horizon Europe research and innovation programme under the Grant Agreement no 101065937
