We had the opportunity to host our friends from the project, Herman Hummel and Rob Segeren from HuFoSS company from the Netherlands.

Together we organized their last stage of talks with stakeholders, as our common goal of our project, this time in Poland.

So far, they have managed to conduct over 250 interviews and surveys in regions such as the Arctic, Baltic, Atlantic and Mediterreanean. We talked with our stakeholders primarily about the local aspects of the Bay of Gdańsk and the balance between ecology, economy and society in the region. The stakeholders were also asked to rank topics and elements on the basis of their knowledge, taking into account their sector and coastal area.

Thank you for this intense but fruitful week!
