

The mission of the Institute of Oceanology is to conduct marine environmental research in order to expand knowledge of the processes and phenomena taking place there. Studies, which are carried out on the Baltic Sea and European Arctic Seas, focus these days on the following four strategic fields: I. The role of the oceans in climate change and its effects on European seas, II. The natural and anthropogenic variability of the Baltic Sea environment, III. Contemporary changes in the coastal ecosystems of shelf seas, IV. Genetic and physiological mechanisms of the functioning of marine organisms, the basics of marine biotechnology.

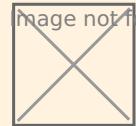

Involvement

WP1, WP2, WP3, WP4, WP5, WP6, WP7, WP8

Team

Professor Jan Marcin Węsławski, dr Joanna Potrykus, dr hab. Lech Kotwicki, prof. Maria Włodarska- Kowalcuk, dr Katarzyna Grzelak, dr Marta Głuchowska, MSc Klaudia Gregorczyk, MSc Marcin Wichorowski, MSc Karolina Gorn, dr Tomasz Kijewski, prof. Tymon Zieliński, dr Paulina Pakszys, dr Joanna Piwowarczyk, MSc Sylwia Bogacz
